

- Write a program which creates two threads one thread displaying "BMS college of engineering" on every 10 second another thread displaying "KSE" on every 2 sec

```

M
class Message implements Runnable {
    String message;
    int interval;
    public Message(String message, int interval) {
        this.message = message;
        this.interval = interval;
    }
    public void run() {
        try {
            while (true) {
                System.out.println(message);
                Thread.sleep(interval);
            }
        } catch (InterruptedException e) {
            System.out.println("Thread Interrupted");
        }
    }
}

```

public class Lab8 {

public static void main(String args[]) {

{

Thread thread2 = new Thread

(new Message("BMS college of En

10000

thread2.start());

Thread thread2 = new Thread (new Message (SE, 200));

30

30

Output → BMS college of Engineering
